PROFESSIONAL SUMMARY

Full-Stack Software Engineer with three internships and two production-deployed applications spanning Java, Spring Boot, React.js, and relational databases (MySQL, PostgreSQL). Grounded in object-oriented design, data structures, and RESTful API architecture, with experience shipping secure, multi-role backend systems and delivering measurable performance improvements. Solved 200+ data structures and algorithms problems on LeetCode and led a team through a 24-hour hackathon under tight delivery constraints.

TECHNICAL SKILLS

Languages: Java, JavaScript
CS Fundamentals: Data Structures & Algorithms, OOP & Object-Oriented Design, Algorithm Complexity Analysis (Big-O), System Design Fundamentals
SW Engineering Practices: Exception Handling, Code Review, Modular/Layered Design, Git
Backend: Spring Boot, REST APIs, Node.js
Frontend: React.js, HTML5, CSS3
Databases: SQL, MySQL, PostgreSQL
Cloud & Tools: AWS (Cloud Practitioner Fundamentals), Git, GitHub, Postman, Maven, VS Code
AI Integration: Claude AI API, ML Feature Engineering

EXPERIENCE

ERP Software Development Intern — UnitedHands Technologies Pvt Ltd Dec 2025 – Jan 2026
Karur, Tamil Nadu

- Contributed to backend development of an ERP system for a gold-ornaments manufacturing client, supporting inventory, order, and production-tracking workflows.
- Collaborated with the engineering team to translate manufacturing business rules into structured, database-backed application modules.
- Delivered assigned modules within a 5-week internship cycle, incorporating mentor and code-review feedback through iterative revisions.

Java Development Intern — Infosys Springboard Nov 2025 – Jan 2026
Remote

- Applied core object-oriented design principles — inheritance, encapsulation, and polymorphism — across mentor-guided Java assignments, reinforcing OOD fundamentals.
- Strengthened exception-handling and defensive coding practices through iterative debugging, root-cause analysis, and structured code reviews, reducing runtime errors and improving code reliability.

Web Development Intern — EtherinfoTech Jun 2024 – Jul 2024
Coimbatore, Tamil Nadu, India · On-site

- Built and shipped responsive UI components integrated with backend REST APIs directly into live product features.
- Adopted Git-based version-control workflows and participated in code reviews, aligning with professional software development practices.

PROJECTS

PhishGuard AI — Real-Time Phishing Detection & Prevention System
React.js, Claude AI API, ML Feature Engineering, Node.js, Cybersecurity
[GitHub](#) | [Live Demo](#)

- Architected a dual-layer detection engine combining client-side ML scoring with Claude AI-powered contextual analysis, achieving sub-120ms detection latency for real-time protection.
- Engineered 20+ URL feature extractors (IP detection, TLD risk, brand spoofing, keyword signals) into a weighted 0–100 risk-scoring model, improving detection accuracy and explainability.
- Integrated the Claude AI API to deliver real-time threat classification, attack-vector identification, and remediation guidance, increasing transparency of flagged threats for end users.

EcoBazaar — Full-Stack E-Commerce Platform
React.js, Java, Spring Boot, PostgreSQL, REST APIs
[GitHub](#) | [Live Demo](#)

- Designed a normalized relational schema in PostgreSQL and exposed it through 15+ RESTful API endpoints built with Spring Boot, supporting product catalog, cart, and end-to-end order-lifecycle management.
- Implemented role-based access control across User, Seller, and Admin roles, enforcing endpoint-level authorization to prevent unauthorized access.
- Applied a layered Controller–Service–Repository architecture, improving scalability and maintainability as new features were added.
- Validated REST API endpoints using Postman across role-based authorization scenarios.

EDUCATION

B.Tech in Information Technology — V.S.B Engineering College, Karur 2023 – 2027
CGPA: 8.23 / 10
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, System Design Fundamentals

LEADERSHIP & ACTIVITIES

Team Lead — ORIGIN, 24-Hour Hackathon Apr 9 – 10, 2026
SIMATS Engineering, Chennai

- Owned end-to-end delivery of a working solution as Team Lead during a 24-hour hackathon, driving ideation, task delegation, and final demo under tight time constraints.

DSA & Competitive Programming: Solved 200+ problems on LeetCode across Arrays, Strings, Trees, Graphs, and Dynamic Programming, strengthening algorithmic problem-solving and complexity analysis.

CERTIFICATIONS

AWS Cloud Practitioner Essentials — AWS Training & Certification Jul 2026
Programming in Java — NPTEL Certification, IIT Kharagpur Jan – Apr 2025
